

NEW ABSENCE PLANNER RELEASED UMANA HR AND PAYROLL

Montreal, Quebec (April 7, 2010) – The new Umana absence planner lets employees request vacations (and other absences) and supervisors approve them, as part of the Umana self-service module. Managers have a comprehensive overview of absences requests, letting them easily take into consideration seniority, manpower requirements, and company and union rules. They can also delegate parts of this responsibility to assistants, coordinators, and replacements. This important productivity tool also includes options for tracking replacements required, and is fully integrated with the Umana timesheet and payroll modules.

The Bibliothèque et Archives nationales du Québec (BAnQ), has been using the Umana absence planner since March 2010. The BAnQ has over 800 employees and manages hundreds of replacements daily.

The absence planner module is part of Umana HR and payroll system from Carver Technologies of Montreal.
