# LAUNCH OF "UMANA TOUCH"

# UMANA HR TIME AND PAYROLL

**Montreal, Quebec (August, 23, 2010)** –

Carver Technologies is proud to announce the release of the new "Umana – Touch" module at the 13th World Human Resources Congress of Montreal. Umana "Touch" is a time clock that permits the users to enter time without the need of a key board, directly via a touch sensitive screen. The user may enter time to different projects if applicable. The information is automatically integrated to the time sheet. The approval process allows the authorized manager to sign off on the time sheet also via the user friendly touch sensitive screen.

This new feature of the Carver Technologies Suite will be demonstrated at the 13th World Human Resources Congress of Montreal, september 27- 29 2010.

**About UMANA and Carver Technologies**

Carver Technologies provides Human Resource and Payroll Management Software Solutions, responding to the needs of organizations of 150 employees and up. Carver Technologies Software Suite is sold under the name UMANA. www.umana.ca

UMANA offers a full range of products comprising 15 modules and all related services

Several of the services included:

- Development to personalize the application where necessary
- Onsite services and advice for optimal installation and configuration
- On site user implementation training

- Full support contract, including updates, telephone support and remote access

All the services required to support a turnkey application adapted to all your needs

In addition:

- A multitude of productivity features
- Renowned user friendly applications
- Solutions that keep pace with evolving technology

Carver Technology excels in responding to the needs of organizations of 150 employees and up. Our Solution can accommodate environments with complex needs such as union environments, varieties of employee groups, timesheets with large numbers of rules, multiple systems, complex benefits, and complex pension plans, etc.

Carver Technologies invests 10 % of our gross revenue in Research and Development in order to improve the functionality and performance of our different software packages. Some of most important projects include our web portal and our new absence management module.
